

No	Specification	Picture
1	Disposable medical protective suits (Cover-all) 175cm	
2	Disinfection Smoke and Mist Spray Machine (Ideal for Outside Work Especially Taxis Ranks, Bus Stops And Train Station	
3	Shopping Mall Disinfectant Humidifier Machine Tank capacity 4.5 Liters Spray Distance 8-10 Meters Spray volume: 0-260ml/min	
4	Electrical Disinfectant Machine Ideal for Offices Spray Range 6-8 Meters 7 Liter Tank Capacity Fog particles less than or equal to 50 Micron(Adjustable) Spray volume: 470ml/min Gross Weight: 4 kg	 <p>Product parameters</p> <ul style="list-style-type: none"> Product name: Intelligent low volume sprayer Power supply: 220V/50Hz Maximum tank capacity: 7L Spray range: 6-8 meters Control method: ON/OFF/PAUSE (Controlled by smart version) Power cord: 6 meters Disinfection rate: 100000/m³/min (Adjustable) Fog particles: less than or equal to 50 microns (Adjustable)
5	Concentrated Disinfectant Liquid 1 Litre Makes 25 Liters	
6	Disinfectant Tunnel	

WHAT IT IS – The tunnel creates an obligatory passage and is equipped with, internal arc-shaped Atomizing nozzles that saturate the environment but preventing dispersions. The nebulization system is connected to a control system capable of automatically mixing the sanitizing product at percentages indicated by the manufacturer. It is possible to sanitize the surface in contact with the ground.

WHAT IT IS USED FOR – Sanitary Gate represents a safe protection for everyone, in particular for those who work in close contact with groups and are therefore at higher risk. It can be installed at the entrance of public offices, pharmacies, supermarkets, airports, hospitals, ports, stations. It is suitable for all private companies who need to hygienist the workforce, goods, vehicles and material, Government office sanitization through gate use.

To prevent further spread of corona virus. People who enter the 'disinfection tunnel' should wash their hands and walk through the 'Disinfection tunnel' for three to four Second
